***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 2-6 are drawn to the image editing in a compressed state in which a first compression method which allows image editing in a compressed state and a second compression method which does not allow image editing in a compressed state.

II. Claims 8-12 and 14-15 are drawn to the image compression in which a first compression method for first compressing the image data and a second compression method for second compressing the image data compressed by the first compression method.

The inventions I and II are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if at least one subcombination is separately usable. In the instant case, each invention has separate utility such as operating either independently or in combination with other subcombinations according to the particular claimed limitations which characterize the invention, without requiring the particular limitations which characterize the other invention(s), as indicated above. See M.P.E.P. § 806.05(d).

Because these inventions are distinct for the reasons given above, requiring separate consideration and search, restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other inventions.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
